# Synchronizing energy transitions towards possible Net-Zero for India: Affordable and clean energy for All

Context: A meeting was convened to discuss the launch of the report titled "Synchronizing Energy Transitions towards Possible Net-Zero for India: Affordable and Clean Energy for All," prepared by IIM Ahmedabad.

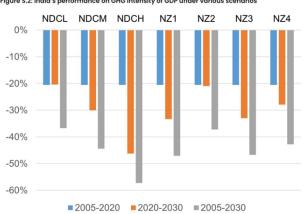

#### Report Overview:

- The report, "Synchronizing Energy Transitions towards Possible Net-Zero for India: Affordable and Clean Energy for All," conducted by IIM Ahmedabad, was sanctioned by the Office of the Principal Scientific Adviser to the Government of India in November 2021.
- Funding for the project, totaling one-third, was provided by the Nuclear Power Corporation of India Ltd (NPCIL).

#### Key Findings:

- Coal is projected to serve as a foundational component of India's energy landscape for the next two decades.
- Achieving net-zero emissions by 2070 necessitates significant investments in both nuclear power and renewable energy sources.
- Decarbonizing the electricity sector must occur well before 2070.
- India's emissions are expected to range between 0.56 btCO2 and 1.0 btCO2 by 2070, with remaining gaps addressed through sequestration methods.
- Effective policies regarding critical minerals and carbon dioxide removal technologies are imperative for the gradual phasing out of coal.
- A transition towards clean and affordable electricity, primarily through nuclear and renewable energy sources, is crucial for widespread electrification.
- Financial estimates suggest a requirement of Rs 150-200 lakh Crore from 2020 to 2070, emphasizing the need for significant international financial support.

#### Remarks:

- The report was underscored as pivotal for India's energy transformation, emphasizing the importance of advancing low-cost hydrogen production technologies.
- Satisfaction with the study's findings was expressed, with a call for a development-focused approach to clean energy transitions, prioritizing renewable and nuclear energy.
- Plans to increase nuclear capacity by 100GW by 2047 were outlined, indicating the report's significance in shaping future energy policies.

### **Al Safety Testing Agreement**

**Context:** Following commitments made at last year's Bletchley Park AI Safety Summit, the US and UK signed an agreement to collaborate on developing tests for advanced AI models.

#### US-UK Agreement on Al Safety:

- Both countries will exchange vital information concerning the capabilities and risks associated with Al models and systems.
- Immediate implementation of the agreement enables collaborative efforts in fundamental technical research on Al safety and security.
- Alignment of approaches towards the safe deployment of AI systems is a shared objective.

#### Partnership Initiatives:

- Collaboration aims to synchronize scientific approaches and accelerate the development of robust evaluations for AI models, systems, and agents.
- Plans include establishing a common approach to Al safety testing and sharing capabilities to effectively address risks.

#### Joint Testing Exercise:

- The partnership intends to conduct at least one joint testing exercise on a publicly accessible model.
- Exploring personnel exchanges between Institutes will tap into a collective pool of expertise.

#### Global Commitment:

 The US and the UK pledge to develop similar partnerships with other nations to advance AI safety worldwide.

#### US Consultation on Open-Source Al Models:

- The National Telecommunications and Information Administration (NTIA) seeks input on risks, benefits, and policy considerations related to open-source AI models.
- Topics include varying levels of openness, innovation, competition, safety, security, trustworthiness, equity, and national security concerns.

#### Industry Perspectives:

- Meta emphasizes open source as the foundation of US innovation, highlighting its importance for economic, domestic, foreign policy, and national security interests.
- OpenAl advocates for both open weights releases and API/product-based releases as tools for achieving beneficial AI.

Current affairs summary for prelims

## 4 April, 2024

#### Global Al Regulation:

- Lawmakers worldwide grapple with legislative frameworks to address the challenges of AI, including setting guardrails and safeguards.
- Recent initiatives include the EU's AI Act, the US White House Executive Order on AI, and discussions on an AI Bill of Rights.

## Antiretroviral therapy coverage for HIV

**Context:** The WHO reported an increase in individuals receiving antiretroviral therapy (ART) in low- and middle-income countries (LMIC) from 23.6 million in 2019 to 26.6 million in 2021.

#### Antiretroviral Therapy (ART) Expansion:

- Projections indicate a 25% increase in individuals receiving ART in low- and middle-income countries (LMICs) by 2025, according to recent WHO publication.
- Insights from this report can inform advocacy, procurement planning, and manufacturing strategies for medications used in treating HIV, viral hepatitis, and sexually transmitted infections (STIs).

#### HIV Statistics:

**NATO** 

 Of the estimated 38.4 million people living with HIV by the end of 2021, the WHO African Region accounted for 25.6 million.

- · Dolutegravir-based ART is the
- primary treatment recommended for HIV in LMICs, both for initial and secondary treatments.

#### Children's HIV Treatment:

 Despite a projected decline in the number of children living with HIV in LMICs, meeting the UNAIDS target of 95% treatment coverage by 2025 would require an increase in the number of children receiving treatment to 1.1 million.

#### Pre-Exposure Prophylaxis (PrEP):

- Oral PrEP utilization globally increased significantly, with around 1.8 million individuals receiving it in 2021, a five-fold rise from 2018.
- The African Region experienced the most significant growth in PrEP use, with projections suggesting up to 5 million individuals may be using PrEP by 2023.

#### Hepatitis B and C Infections:

- Chronic hepatitis B and C infections remain significant global burdens, with over 350 million affected globally as of 2019.
- An estimated 3 million new infections occur each year.

#### Sexually Transmitted Infections (STIs):

- Around 374 million new infections annually with one of four curable STIs: chlamydia, gonorrhea, syphilis, and trichomoniasis.
- Approximately 930,000 pregnant women annually have probable active syphilis, targeted in WHO's initiative to eliminate mother-to-child transmission along with HIV and Hepatitis B.

#### Global Health Sector Strategies:

- The 75th World Health Assembly approved the implementation of WHO's global health sector strategies on HIV, viral hepatitis, and STIs for the period 2022-2030.
- These initiatives align with the UNAIDS Global AIDS Strategy 2021-2026, aiming to reduce inequalities driving the AIDS epidemic and end AIDS as a public health threat by 2030.

### **News in Between the Lines**

Today, the North Atlantic Treaty Organization (NATO) celebrates its 75th anniversary since its establishment on April 4.

#### **About NATO:**

- The North Atlantic Treaty Organization (NATO) is an international military alliance that was established in 1949.
- Its primary goal is to protect the freedom and security of its members through political and military means.
- It is made up of 32 countries from North America and Europe, including the US, UK, France, Germany, Italy, Spain and Turkey.
- A crucial aspect of NATO is Article 5 of the Washington Treaty, which enshrines the principle of collective defense.
- According to this article, an attack against one member is considered an attack against all, necessitating a collective response.
- NATO's engagement with non-member countries like India reflects its efforts to adapt to changing global security challenges and foster cooperation beyond its traditional boundaries.
- The member countries are sovereign states that come together to discuss political and security issues and make collective decisions by consensus.
- Its headquarter is located at Brussels in Belgium.

### **UN Human Rights** Council

Recently, the UN Human Rights Council announced its consideration of a draft resolution proposing an arms embargo on Israel, citing concerns about the "plausible risk of genocide in Gaza."

#### **About UN Human Rights Council:**

- The United Nations Human Rights Council (UNHRC) is an intergovernmental body that promotes and protects human rights around the world.
- The United Nations Human Rights Council (UNHRC) was established in 2006 by the United Nations General Assembly, replacing the United Nations Commission on Human Rights (UNCHR).
- It comprises 47 member states elected by the UN General Assembly through a majority vote.
- It conducts periodic reviews of human rights situations in UN member states through the Universal Periodic Review (UPR) mechanism.
- It addresses specific human rights violations, monitors human rights situations globally, and recommends measures to address them.
- Its headquarter is located in Geneva, Switzerland.

### Right to **Information Act**

Recently, the Indian Security Press (ISP) and the State Bank of India have refused to divulge information on electoral bonds under the RTI Act.

#### **About Right to Information Act:**

- The Right to Information (RTI) Act 2005 is a fundamental right in the Indian Constitution.
- It allows citizens to access records held by the central and state governments.
- The act was passed by the parliament in June 2005.
- Its aim is to inculcate a culture of openness, accountability and participatory governance.
- The Act and its rules outline procedures for requisitioning information, specifying time frames, methods of disclosure, application charges, and exemptions for non-disclosure.
- It helps in exposing corruption prevailing in the government systems, bringing the focus on any violation of human rights and highlighting malpractices of government authorities at union or state
- The RTI Act 2005 is enshrined in article 19(1) of Part 3 of the Indian Constitution.

Recently, India has vehemently denied allegations of human rights and environmental abuses made by a Chicago-based human rights group at its shrimp farms.

#### **About Shrimp Farming:**

- Shrimp farming involves the cultivation of shrimp species in controlled aquatic environments such as ponds, tanks or enclosures.
- It is prevalent in coastal regions, particularly in states like Andhra Pradesh, Tamil Nadu, Gujarat and West Bengal.
- Common shrimp species cultivated include the Pacific white shrimp (Litopenaeus vannamei) and the Black Tiger shrimp (Penaeus monodon) among others.
- This farming often begins in hatcheries where shrimp larvae are bred and raised under controlled conditions before being transferred to grow-out ponds or tanks.
- Shrimp farming can have environmental implications such as habitat destruction, water pollution and mangrove deforestation if not managed sustainably.
- This farming contributes significantly to local economies by providing employment opportunities, income generation, and export revenue.
- India is the largest supplier of shrimp, a favorite seafood source for the U.S.

## 4 April, 2024

Recently, restrictions were placed on visitors to the Ahobilam shrine, comprising nine temples within the Nallamala forest, located in the Nagarjunasagar-Srisailam Tiger Reserve.

About the Nagarjunasagar-Srisailam Tiger Reserve:

- The Nagarjunasagar-Srisailam Tiger Reserve (NSTR) is the largest tiger reserve in India.
- The reserve is located in the Nallamala hill range, which is part of the Eastern Ghats in Andhra Pradesh and the Krishna River runs through this reserve.
- It was declared officially in the year 1978 and has been recognized by the Project Tiger in the year 1983.
- This Reserve has been renamed as the Rajiv Gandhi Wildlife Sanctuary in the year 1992.
- This reserve is managed by the National Tiger Conservation Authority (NTCA), established in 2005 under the Wildlife (Protection) Act, 1972.
- The reserve is home to the primitive tribes of Chenchus and Lambada, with 16 villages in the core area.
- Flora: The habitat contains unique plants like Andrographis nallamalayana, Eriolaena lushingtonii, Crotalaria madurensis Var, Dicliptera beddomei, and Premna hamiltonii.
- Fauna: The reserve's fauna features top species like tiger, leopard, wolf, wild dog and jackal, alongside prey species such as sambar, chital, chowsingha, chinkara, mouse deer, wild boar, and porcupine.

### **POINTS TO PONDER**

- Recently, the Indian scientists have made significant progress in understanding the genetic makeup of the virus responsible for which disease? - Lumpy skin disease
- According to the Indian Constitution, which article designates the Supreme Court as the 'Court of Record' with the power to punish for contempt of itself? - Article 129
- Which body of water is also referred to as the East Sea and was the location where North Korea recently fired a ballistic missile? - Sea of Japan
- In a recent ruling, the Supreme Court affirmed that Muslim women possess the absolute right to unilateral and extra-judicial divorce through which Islamic legal process? - Khula
- The Katchatheevu islet, which has become a contentious issue in the India-Sri Lanka fishing dispute, is situated: To the northeast of Rameswaram (India) and southwest of Jaffna (Sri Lanka).
