Fixed-dose Combination Drugs

Context: The Union Government has decided to ban 156 FDCs, taking the total number of banned FDCs to 499.

What Are Fixed-Dose Combination (FDC) Drugs?

- **Definition**: FDCs are medications that combine two or more active ingredients into a single dosage form (pill, capsule, or injection).
- Purpose: They aim to simplify treatment regimens by reducing the number of medications needed and improving adherence. FDCs are often used for conditions requiring multiple treatments, such as tuberculosis, diabetes, or infections.

Why Were 156 FDCs Banned?

- Irrational Combinations: The central government deemed these FDCs "irrational" as they contained ingredients that did not work well together or included unnecessary components.
- Lack of Therapeutic Benefit: These combinations were found to offer no significant therapeutic advantage.
- Antibiotic Resistance: Some FDCs included unnecessary antibiotics, contributing to increased antibiotic resistance. In 2020, India had one of the highest proportions of antibiotic FDCs, with many combinations deemed inappropriate by the WHO.
- Pricing Control Issues: Companies often created FDCs to circumvent pricing regulations for essential medicines, allowing them to escape ceiling prices set by the government.

Examples of Banned FDCs

• Cold and Fever Medicines:

- Cheston Cold (contains paracetamol for fever, cetirizine for allergy relief, and phenylephrine for nasal decongestion)
- Foracet (used for pain relief)
- Gastrointestinal Enzyme Combinations: Used for treating digestive issues.

Anti-Allergic Combinations:

- Levocetirizine with nasal decongestants
- Syrups that break down mucus combined with paracetamol

Skin and External Use Combinations:

- Medicated soap with menthol and aloe vera
- Silver sulfadiazine (used for burns) combined with an antiseptic agent
- Aloe vera with vitamin E
- Calamine lotion with aloe extract

Miscellaneous:

- Combination of migraine medicine with an antinausea drug
- Combination of sildenafil (for erectile dysfunction) with a drug that relaxes blood vessels
- Tranexamic acid (used for bleeding control) with an anti-fibrotic medicine

Current Status and Effects

- Market Availability: Manufacturers have been instructed to stop producing, stocking, and selling these FDCs. However, they may remain available in the market temporarily until existing stock is depleted.
- Health Impact: Although these drugs might still be consumed, their banning is aimed at preventing future misuse and addressing health concerns.

Government Actions and Future Measures

- New Regulations: The 2019 drug and clinical trial rules mandate that FDCs be considered new drugs and require approval from the central drug regulator.
- Historical Context: The issue of irrational FDCs was first highlighted in 2012 by a parliamentary panel. In 2014, a committee reviewed 3,450 FDCs, identifying 963 as irrational, leading to the banning of 499 such drugs since then.
- Ongoing Efforts: The government continues to regulate and review FDCs to ensure their safety and effectiveness, aiming to improve overall medication standards

Bail Provision for First-Time Offenders

Context: The Supreme Court ruled that the new bail provisions for first-time offenders under the Bharatiya Nagarik Suraksha Sanhita (BNSS) law will have a "retrospective effect."

Supreme Court Ruling on BNSS Bail Provisions

• Retrospective Effect:

 BNSS bail provisions apply to first-time offenders even if the offence occurred before the BNSS law's July 1, 2024, implementation.

• Impact on Undertrials:

- Significant effect on India's undertrial prisoners.
- National Crime Records Bureau 2022 report:
- 1,330 prisons at 131.4% occupancy.
- 75% of 573,200 prisoners are undertrials.

Bail Provisions for Undertrial Prisoners

• Previous Laws:

- BNSS (Section 479) and Criminal Procedure Code, 1973 (Section 436A) allow bail if:
- Undertrial has been detained for up to half the maximum imprisonment period.
- Exceptions for offenses punishable by death or life imprisonment.

BNSS Update:

 Shortens detention period for first-time offenders to one-third of the maximum imprisonment period.

Supreme Court Monitoring and Orders

Background:

 Ongoing monitoring of prison conditions since 2013 due to overcrowding, prisoner deaths, and staff issues.
